

HDI Low Viscosity TOSOH HXLV

ABOUT:

[Coronate HXLV](#) is a low-viscosity solvent-free hexamethylene diisocyanate trimer based polyisocyanate (HDI Trimer). Coronate HXLV can react with appropriate polyols to produce non-yellowing polyurethane paints with excellent weatherability, excellent UV resistance, and excellent heat resistance.

Tosoh Coronate HXLV Physical Properties:

% NCO	22.5-23.9%
Viscosity @ 25C	700-1400 cps
Color	< 40 APHA
Free Monomer	< 0.2%

FEATURES:

Aliphatic Isocyanate - HDI Trimer

UV Stable, non-yellowing

High heat resistance

High Solubility

Good Compatibility with Polyols

Low Viscosity

Storage and Transportation:

STORAGE: It is recommended to store in a dry and cool area with proper ventilation.

Packaging:

200KG/drum Please fasten the packaging cover as soon as possible after original packaging to prevent the mixing of other substances such as moisture and other substances that may affect the performance of the product. Do not inhale dust, avoid skin and mucous membrane contact. Smoking, eating and drinking are prohibited in the workplace. After work, shower and change clothes. Store contaminated clothes separately and reuse them after washing. Maintain good hygiene practices.
