

HDI Low Viscosity Vencorex HDT-LV2

ABOUT:

[Tolonate™ HDT-LV2](#) is a solvent-free, very low viscosity aliphatic polyisocyanate based on Hexamethylene Diisocyanate trimer (HDI homopolymer). This product is supplied at 100% solids and is designed to reduce VOC emissions of the formulations. It is used for very high solids, low VOC, two component polyurethanes coatings and varnishes. This product is also suggested for solventfree and waterborne polyurethane systems as well as polyurethane resin synthesis intermediates.

BENEFITS:

Adhesion,
Heat & humidity resistance,
VOC reduction,
Weathering Resistance

APPLICATIONS:

Coatings & Adhesives,
Adhesives & Sealants,
Adhesives for Battery,

Construction,

Resins for coatings & Inks,

Elastomers & TPU

Storage and Transportation:

STORAGE: It is recommended to store in a dry and cool area with proper ventilation.

Packaging:

200KG/drum Please fasten the packaging cover as soon as possible after original packaging to prevent the mixing of other substances such as moisture and other substances that may affect the performance of the product. Do not inhale dust, avoid skin and mucous membrane contact. Smoking, eating and drinking are prohibited in the workplace. After work, shower and change clothes. Store contaminated clothes separately and reuse them after washing. Maintain good hygiene practices.
