

IPDI Quick drying Evonik T1890E

ABOUT:

[VESTANAT® T 1890](#) is a cycloaliphatic polyisocyanate crosslinker with remarkably short curing cycles even at ambient temperatures.

POLYISOCYANATE CROSSLINKERS IN 2K SYSTEMS:

- Combination with a resin component right before application
- Reaction starts immediately after mixing the polyisocyanate with the resin component
- Reaction leads to a 3D network with a high durability

Benefits:

- Low viscosity
- Excellent compatibility & high reactivity
- Durability against environmental impacts
- UV resistant, lightfast and very good gloss retention
- First-class chemical resistance
- High reactivity even at ambient temperature
- Short curing cycles

Storage and Transportation:

STORAGE: It is recommended to store in a dry and cool area with proper ventilation.

Packaging:

200KG/drum Please fasten the packaging cover as soon as possible after original packaging to prevent the mixing of other substances such as moisture and other substances that may affect the performance of the product. Do not inhale dust, avoid skin and mucous membrane contact. Smoking, eating and drinking are prohibited in the workplace. After work, shower and change clothes. Store contaminated clothes separately and reuse them after washing. Maintain good hygiene practices.
